Hybrid Wood

Hybrid Wood is a further developed concept within the Hybrid rack series. The aluminum corner-pillars are dressed in solid wood, for a luxury appearance that will blend in your home. Solid wood parts are available in cherry, black oak, oak and walnut of interior design quality. Preferably combined with matching veneer shelves or concrete shelves.

Hybrid Wood rack series has two optional integrated isolation systems.

The Top Shelf isolation system is based on the a very efficient mechanical suspension system. The Top Shelf isolation system is elegantly hidden in the corner pillars. The second isolation system is integrated in the shelves so that each shelf will be independently isolated. Both isolation systems efficiently cancels out all non-desired vibrations, that origin from the floor or from the components within the rack.

The top shelf is made of a unique sandwich board, especially developed for acoustic damping, with matching veneers. Additionally, the Hybrid Wood rack can be equipped with a sideboard.

The Hybrid Wood can be built in a side-by-side design just as the Hybrid standard.

Hybrid Wood

Example designs using the four building blocks: Shelf-kit, and corner pillars in four different sizes

3-shelf-kit design

3-shelf-kit design

2-shelf-kit design

1-shelf-kit design

3-shelf-kit design

2-shelf-kit design

8-shelf-kit design

Hybrid Wood building blocks: The Shelf-kit (shelves and extrusion) and corner pillars

Corner pillars in black oak, walnut, oak and cherry

Shelves in concrete, walnut, black oak, oak and cherry

Extrusion in silver or black aluminum

Four different pillar lengths

Hybrid Wood options and accessories
